DETAILED ACTION

Applicants' amendment dated 08/14/2006 has been received and entered. By the amendment, claims 1-30 are remain pending in the application.

Applicant's arguments dated 08/14/2006 claims have been considered but are moot in view of the new ground(s) of rejections as follow.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al., WO 03/058332 A1.

Regarding claims 1, 3-8, 10-15, 17-25, 27-30, Lee et al. disclose a an array substrate (figure 3) for a liquid crystal display (LCD) device comprising:

- . a substrate 100;
- . a plurality of gate lines 135;
- . a plurality of thin film transistors TFTs 195, each having a gate electrode 110, a source/drain electrode 140/145;
- . an interlayer insulating layer 155;
- . a first gate redundancy line 170;
- . a passivation layer 180;

Art Unit: 2871

. a second gate redundancy line 175;

. a pixel electrode (185);

Lee et al., however, do not disclose the first gate redundancy line being formed of the same material as one of the source and the drain electrode. It would have been obvious to one skilled in the art at the time of the invention was made to form a gate redundancy electrode and source/drain electrode having a same based material, since it is a common practice in the art to simplify process steps for forming an LCD device.

Regarding claims 2, 9, 16 and 26, although Lee et al. do not explicitly disclose a top gate type TFT, it would have been an obvious to one having ordinary skill in the art at the time the invention was made to employ the Lee et al device having a top gate TFT since the examiner takes Office Notice of the equivalence of a top gate type TFT and a bottom type TFT for their use in the display art and the selection of any of these known equivalents to operate a display device would be within the level of ordinary skill in the art.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2871

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
